Summary of findings

Overall summary

Cleeve Lodge is a care home that provides accommodation with personal care, over three floors, for up to 33 people.

The service had been identified by the Local Authority as a designated care setting. A designated care setting is intended for people who have tested positive for Covid-19 and are being admitted to a care home from hospital.

We found the following examples of good practice.

The provider had identified a self-contained unit within the home to be the designated area. Four bedrooms were available to support hospital discharges. Each room had en-suite facilities.

There was a separate entrance for this unit so access to this area was safe. The designated unit was clean and well-decorated.

The provider had identified dedicated care staff to work in the unit. The staff team would not work anywhere else in the home during the use of this unit. This helped to minimise the risk of cross infection.

Plans had been made for winter when staff sickness, poor weather or an outbreak were most likely to occur. This information was referred to in the homes 'Business Continuity Plan' (staff deployment / resilience).

All members of staff had completed a Coronavirus workbook and were up to date with their infection control training. They had received a supervision session specifically relating to Covid-19 infection control which included the donning and doffing of PPE.

The provider had good supplies of appropriate personal protective equipment (PPE) such as gloves, aprons and masks. All staff had training in how and when to wear the PPE correctly. There was a PPE station on the unit so they would be easily accessible by staff.

New equipment had been sourced and purchased to prevent cross contamination. This included moving and handling aids, clinical waste and laundry provision, new cutlery and items to support safe medicine administration.

The provider had up to date infection prevention and control policies and was following national guidance. We were assured that this service met good infection prevention and control guidelines as a designated care setting.

Fire safety had been considered and professional advice had been sought to ensure regulations were being met.

Further information is in the detailed findings below.

The five questions we ask about services and what we found

We always ask the following five questions of services.

Is the service safe?

We were assured the service were following safe infection prevention and control procedures to ensure people received safe care and treatment.

Cleeve Lodge Care Home

Detailed findings

Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

This was a targeted inspection looking at the infection control and prevention measures the provider has in place. As part of CQC's response to the coronavirus pandemic we are conducting a review of infection control and prevention measures in care homes.

The service had been identified for use by the Local Authority as a designated care setting in response to the Winter Plan for people discharged from hospital with a positive Covid-19 status. This inspection was to ensure that the service was compliant with infection control and prevention measures.

This inspection took place on 25 November 2020 and was announced.

Is the service safe?

Our findings

Our findings

S5 How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks could be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
