## Summary of findings

### Overall summary

Forest View Care Home is a 'care home'. Forest View Care Home provides accommodation and care to up to 24 older people living with dementia. At the time of our inspection 24 people were living in the home.

We found the following examples of good practice.

• The premises were clean and well maintained. Hand sanitiser and personal protective equipment (PPE) were readily available throughout the premises. Visitors had a separate entrance to the care home to the minimise the risk of infection. Visitors had their temperature taken and recorded, PPE was available and people were supported to follow the Government's guidance on wearing PPE and social distancing.

• The provider had appropriate arrangements to test people and staff for COVID-19 and was following government guidance on testing. This ensured that people and staff were tested for COVID-19 in a consistent way in line with national guidance.

• The provider ensured that staff received appropriate training and support to help prevent the spread of infection. All staff had received training on infection control and the use of PPE. Staff were assigned to work at the one location to help minimise the risk of cross infection. Staff wellbeing was supported if they became unwell and when they returned to work.

• The provider ensured that people using the service could maintain links with family members and friends. Family members and friends could stay in touch with people with phone and video messaging. The provider had a visitor's room available which had a small room next to it with a glass window and speaker system. This meant people were safe from the risk of infection as visitors had no physical contact with people living at the service. The provider understood the communication needs of people.

• The registered manager sought support and advice from external agencies including the Clinical Commissioning Group, the local authority, local care homes and Public Health England and was open to all advice and guidance offered to help keep people safe.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

#### Is the service safe?

We were assured the service were following safe infection prevention and control procedures to keep people safe.

# Forest View Care Home Detailed findings

# Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to the coronavirus pandemic we are looking at the preparedness of care homes in relation to infection prevention and control. This was a targeted inspection looking at the infection control and prevention measures the provider has in place.

This inspection took place on 11 February 2021 and was announced.

## Is the service safe?

# Our findings

S5 How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.

We have also signposted the provider to resources to develop their approach.
