# Summary of findings

## Overall summary

Burton Oaks is a residential care home providing accommodation and personal care for up to 28 older people and people living with dementia. On the day of inspection there were 21 people living in the service.

We found the following examples of good practice.

Safe arrangements were in place for visitors to the service including relatives and friends, professionals and others. This included a booking system, rapid LFD testing, showing evidence of vaccination, temperature checks and sign in process.

Isolation, cohorting and zoning was used to manage the risk of infection spread. This meant people self-isolated in their rooms when necessary and staff were allocated to work in certain areas of the service should anyone test positive for COVID-19.

Enhanced cleaning and disinfection of all areas of the service continued to take place to reduce the risk of cross contamination.

There was plenty of personal protective equipment (PPE) including masks, gloves, aprons and hand sanitiser available. PPE stations were located around the service. Used PPE was disposed of safely in clinical bins.

A regular programme of testing for COVID-19 was in place for staff and people who lived in the service. This meant swift action could be taken if anyone received a positive test result.

There were no agency staff working in the service which meant fewer staff coming in and out of the building. This helped keep people safe. The staff team worked together to cover any gaps in the rota.

The registered manager had good oversight of infection prevention and control processes. They undertook regular quality assurance checks.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

Further information is in the detailed findings below.

**Inspected but not rated**

# Burton Oaks

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

We received some information of concern about infection prevention and control measures at this service. This was a targeted inspection looking at the infection prevention and control measures the provider has in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 10 January 2022 and was unannounced.

# Is the service safe?

## Our findings

### Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures

How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
- We were assured the provider was facilitating visits for people living in the home in accordance with the current guidance.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The service was meeting the requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
