# Summary of findings

## Overall summary

Green Lane Intermediate Care Centre is a 'care home'. People in care homes receive accommodation and nursing or personal care as single package under one contractual agreement. CQC regulates both the premises and the care provided, and both were looked at during this inspection. There was 25 people at the service.

We found the following examples of good practice.

Risks in relation to visitors had been assessed and visiting was encouraged. We looked at the visitors book which showed visits had taken place as well as window visits and phone/video calls. One person said, "My son comes every day to see me the staff make him feel welcome."

We observed staff correctly wearing personal protective equipment (PPE). The service was very clean throughout.

The home was accessing regular testing for both staff and residents. All residents and staff were double vaccinated.

We saw clear infection prevention control (IPC) signs which reminded everyone at the point of entry and throughout the home about procedures for infection control.

## The five questions we ask about services and what we found

We always ask the following five questions of services.

### **Is the service safe?**

We were assured the service was following safe infection prevention and control procedures to keep people safe.

**Inspected but not rated**

# Green Lane Intermediate Care Centre

## **Detailed findings**

### Background to this inspection

We carried out this inspection under Section 60 of the Health and Social Care Act 2008 as part of our regulatory functions. This inspection was planned to check whether the provider is meeting the legal requirements and regulations associated with the Health and Social Care Act 2008.

As part of CQC's response to care homes with outbreaks of COVID-19, we are conducting reviews to ensure that the Infection Prevention and Control (IPC) practice is safe and that services are compliant with IPC measures. We had also received information of concern about visiting arrangements at this service.

This was a targeted inspection looking at the IPC practices the provider has in place. We also asked the provider about any staffing pressures the service was experiencing and whether this was having an impact on the service.

This inspection took place on 26 January 2022 and was announced. We gave the service one day notice of the inspection.

# Is the service safe?

## Our findings

### Staffing

- The provider told us they had measures in place to mitigate the risks associated with COVID-19 related staff pressures. The registered manager told us they had no concerns around staffing at the service, they had used regular agency staff where needed.

### How well are people protected by the prevention and control of infection?

- We were assured that the provider was preventing visitors from catching and spreading infections.
- We were assured that the provider was meeting shielding and social distancing rules.
- We were assured that the provider was admitting people safely to the service.
- We were assured that the provider was using PPE effectively and safely.
- We were assured that the provider was accessing testing for people using the service and staff.
- We were assured that the provider was promoting safety through the layout and hygiene practices of the premises.
- We were assured that the provider was making sure infection outbreaks can be effectively prevented or managed.
- We were assured that the provider's infection prevention and control policy was up to date.
- The provider was facilitating visits for people living in the home in accordance with the current guidance.

From 11 November 2021 registered persons must make sure all care home workers and other professionals visiting the service are fully vaccinated against COVID-19, unless they have an exemption or there is an emergency.

- The service was meeting the requirement to ensure non-exempt staff and visiting professionals were vaccinated against COVID-19.
